

BPP Vietnam Carbon Markets Concept Note 2022

Form Preview

Business Partnerships Platform (BPP) Vietnam Carbon Markets Concept Note

* indicates a required field

The BPP is supported by the Australian Government ([DFAT](#)) and implemented by [Palladium](#) (BPP Fund Manager). If you have any issues or queries regarding this form, please contact the BPP team at applications@thebpp.com.au.

Before you commence your application, please read the [Guidelines for Applicants](#). You can also view the [BPP website](#) for more information.

Confidentiality

All application data will be kept in the strictest confidence. All DFAT officers and the BPP Fund Manager personnel that review applications are bound by confidentiality/non-disclosure arrangements.

Application Number

This field is read only.

The system generates an identification number or code for your submission.

Proposal Title *

Proposed Start Date *

Must be a date.

The proposed start date should be from 1 August 2022.

Proposed End Date *

Must be a date.

End date should be no later than 30 September 2024.

Concept Note

The BPP invites the submission of proposals for BPP partnerships addressing one of the two target areas:

Enabling Carbon Markets: focus on enabling the conditions, standards and practices for high-quality carbon market projects with strong development outcomes to thrive in Vietnam.

•

- Proposals must focus on addressing an identified market or inclusion barrier to developing or investing in high-quality carbon offset projects in Vietnam.
- Indicative examples of barriers that could be addressed are: finding opportunities to enhance non-carbon social benefits from expansion of carbon

markets, building local capacity in Measurement, Reporting and Verification (MRV) of GHG mitigation, supporting capacity building for carbon inventory and setting up MRV systems, advancing innovative and cost-effective data collection methods to measure non-carbon benefits, enabling innovative financial products to support standards certification, facilitating participation in carbon markets by women and other underrepresented groups in the industry.

Carbon Projects: support innovative partnerships to pilot or demonstrate best-practice models for generating verified carbon credits contributing to permanent carbon abatement and strong development outcomes.

- - **Sectors:** proposals should align with one or more sectors identified under Vietnam's Nationally Determined Contribution (NDC): waste, land use, land-use change and forestry, agriculture or energy.
 - **Carbon offsets:** proposals must focus on generating carbon abatement with the intent to contribute to offset units through developing new projects under rigorous methodologies and carbon standards aligning with those accepted under Climate Active, for example Verra and Gold Standard. Alternative standards may be considered with justification provided by the applicants.
 - **Measurable non-carbon benefits from expansion of carbon markets:** proposals must demonstrate how measurable non-carbon benefits to communities are produced through economic opportunities and gender and social inclusion outcomes. These outcomes may extend beyond the direct BPP support period.
 - **Time horizon:** we recognise carbon abatement projects have significantly longer lifespans than BPP support. BPP support can help in the testing and development of models that can exemplify high quality carbon projects with significant social and environmental co-benefits. For example, support could help to pilot new technology, develop innovative MRV systems, or advance robust community engagement and social inclusion models.

Which of the above target areas does your proposal support? *

Carbon Projects

You can select only one option. A relevant concept note template will automatically appear.

Enabling Carbon Markets Proposals

You have selected Enabling Carbon Markets target area.

Enabling Carbon Markets Proposals focus on enabling the conditions, standards and practices for high-quality carbon market projects with strong development outcomes to thrive in Vietnam.

- Proposals must focus on addressing an identified market or inclusion barrier to developing or investing in high-quality carbon offset projects in Vietnam.
- Indicative examples of barriers that could be addressed are: finding opportunities to enhance non-carbon social benefits from expansion of carbon markets, building local capacity in Measurement, Reporting and Verification (MRV) of GHG mitigation, supporting capacity building for carbon inventory and setting up MRV systems, advancing innovative and cost-effective data collection methods to measure non-carbon benefits, enabling innovative financial products to support standards certification, facilitating participation in carbon markets by women and other underrepresented groups in the industry.

Have any of the partnering organisations received prior funding from the Australian Government in any capacity, or funding from other donors? If so, briefly describe. *

Word count:

Must be no more than 200 words.

Acknowledgements

In relation to Australia's aid program, DFAT undertakes a range of risk management measures, including: fraud control and the application of safeguards. BPP proposals will need to comply with related policies in order to be eligible.

For more information about DFAT's risk management policy click [here](#).

I acknowledge that this BPP proposal complies with the relevant policies and guidelines. *

Acknowledged

I acknowledge that, in the event that our BPP proposal is shortlisted, the main applicant organisation(s) may be subject to a due diligence assessment. *

Acknowledged

I acknowledge that DFAT and BPP may vary the overall funding offered through the program at its sole discretion, and DFAT cannot guarantee funding for every application received, and cannot guarantee funding to the full amount requested by any applicant. *

Acknowledged

I acknowledge that taxes cannot be paid for with BPP grant funding. If selected, during the BPP funding period, a new tax is introduced or an existing tax is changed in relation to the partnership, partner(s) is responsible for payment. *

Acknowledged

Agreement and Declaration

• I certify that the statements in this application are true. • I have been authorised to submit this application on behalf of the applicant organisation.
